2023 AGA Abstract Awards

Type of Research

Which definition below best describes the research described in the abstract?

- Clinical: Research involving direct contact with human subjects or using clinical data to address problems related to the prevention, diagnosis, treatment or outcome of human diseases (e.g., clinical epidemiology). This category also includes research related to healthcare delivery (e.g., health services, health IT).
- Basic/Translational: Research with the primary goal of understanding basic biology or disease mechanisms. This category can involve animal subjects, cell culture, human biospecimens or human data as resources for laboratory- or informatics-based investigation.

- Clinical Research
- Basic/Translational Research

Area of Study

Select the category that best describes your abstract's area of study.

Relevance to Health Disparities Research

Please indicate if the research presented in your abstract involves health or healthcare disparities.

- Health or healthcare disparities.

Abstract Title

2023 AGA Abstract Awards

Application Category  Applicant Information  Abstract  Sponsor Information  Upload Documents  Contact Permissions

Please identify your AGA member sponsor.

Note that AGA Fellow Abstract Award applicants must be sponsored by an AGA member in good standing.

Sponsor's Information

In the Sponsor's Name field, search for the name of your sponsor by their last name, then first name, without any punctuation. Click on their name and once selected the fields below should auto-populate with their information.

Please note that the search query may take several seconds and that only individuals with active AGA memberships are included in the search.
